CSS transition

① Property what to transition.
② Transition duration

① transition - property
transition - duration
       e in s or ms.

& →
```
a {
    background - color: Orange;
    transition-property: background-color;
    transition-duration: 2s;
}

a: hover {
    background-color: limegreen;
}
```

② Timing function.
    ↳ Pace of transition.

↓

ease

ease - in →

ease out -

ease - in-out →

linear -

transition-timing-fun: ease-out;

③ delays →

transition - delay: 0s

④ shorthand:

transition: transition-property transition-duration

⟋ transition - timing function transition-delay

any one value left

e@ if we'll take the default value

but 1 exception.

delay.

⟋

We have to give

don't if we want to set delay.

⑤ combination (,) ⟍ chaining

transition: ___ __ , ___ __ __

(1st transile (2nd trans

transition: all ___ __
